

Suffield Solar Project Update

Suffield Solar LP (“Suffield Solar”), a wholly owned subsidiary of Canadian Solar Inc., is developing the Suffield Solar Project. At Suffield Solar we believe in keeping our neighbours and stakeholders informed and up to date on our Projects. We are sending you this newsletter to provide an update on the Suffield Solar Project (“Project”), located on the SW 23-15-10 W4M, approximately 10 km northwest of the Hamlet of Suffield, as shown below.

Our stakeholder engagement efforts commenced in June 2016 and will be ongoing through the pre-construction, construction and operation phases of the Project. The initial Alberta Utilities Commission (AUC) power plant approval was received for the Project in February 2017. In August 2019, we received amendment approval to our new equipment changes and a schedule update; however, due to the current construction progress, the completion of the construction will be delayed to Q3 2020.

As a result of this modification, Suffield Solar is required to submit a Letter of Enquiry (LOE) to gain approval from the AUC for the time extension. Suffield Solar intends to submit the LOE in October 2019.

Interconnection Approval

In order to connect to the FortisAlberta distribution grid, Suffield Solar received the interconnection approval from the AUC in April 2019.

Project Schedule

Suffield Solar would also like to provide stakeholders with an updated project schedule as a result of these changes. The updated project schedule is as follows:

Stakeholder Consultation	Ongoing
AUC Power Plant Approval Received	February 2017
Submit Letter of Enquiry for Amendments	Q4 2018
Interconnection Application	Q4 2018
AUC Approval Revised	Q1 2019
Construction	Underway, Q4 2019
In Service Date	Q3 2020
